The AeroSeal® Solution

1 LEAK CHECK

Your Bryant dealer will check the ductwork for leaks using a combination of methods including a visual inspection of exposed ductwork, a thorough diagnostic and checking air temperature at the air vents. Computer analysis before and after the AeroSeal duct sealing is available as well.

2 PATENTED DUCT SEALING EQUIPMENT

The AeroSeal blower system suspends dry adhesive particles in air until they find the leak and fill it. A computer-monitored fan ensures efficient flow of this unique adhesive to your ductwork.

3 SELF-SEALING AEROSEAL PARTICLES

Self-sealing vinyl polymer aerosol particles fill gaps as wide as 3/8" to provide a safe, long lasting seal in typical trouble spots like corners and seams. The holes are filled without coating the entire duct system.

4 LEAK IS SEALED

Funding by the U.S. Department of Energy helped speed the development of AeroSeal. Today, the finished product is recognized by the Environmental Protection Agency as an effective way to seal your ducts for money savings and improved comfort.

Seal Out Airborne Contaminants For Improved Indoor Air Quality.

Leaks in your ductwork not only let conditioned air escape, they allow dust, pollen and other airborne particles to be drawn into your home. These particles circulate throughout your living areas, settling on floors, furniture and infiltrating the air you breathe. AeroSeal improves indoor air quality by sealing out these pollutants. It's a great idea for asthma and allergy sufferers, and it helps keep your heating and cooling system running cleaner and more efficiently as well.

Remember, your home is your refuge from the unpredictable elements outside. AeroSeal Certified Duct Analysis and Sealing is a safe, smart, effective way to ensure maximum indoor comfort, energy efficiency and air quality.

Sealing your ducts helps keep cleaner, filtered air inside while preventing sawdust, wood fibers, insulation particles, and unfiltered outdoor air from infiltrating your home.

"Comfort & care are key"

a Comfort24-7 provider

479 W. Wise Rd. Schaumburg IL 60193

Certificate of Completion

Duct Sealing Performed for:
Jerry

Saint charles, IL 60175

Overall Sealing Results

When we arrived,
YOUR DUCTS HAD:

261 CFM of Leakage, equivalent to a
50 Square Inch Hole

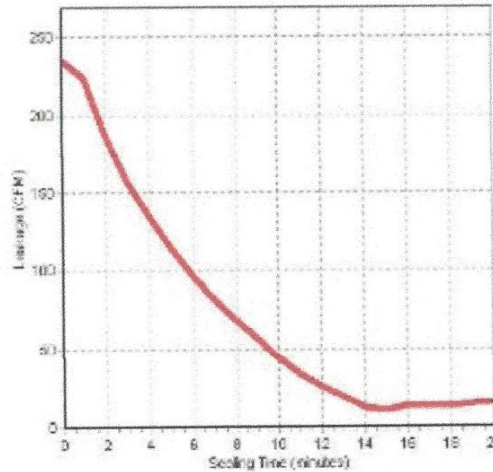

After we finished,
YOUR DUCTS HAVE:

12 CFM of Leakage, equivalent to a
2 Square Inch Hole

This corresponds to a **95% Reduction** in Duct Leakage

Note: Duct leakage results are calculated in cubic feet per minute (CFM) measured at a standard OPERATING PRESSURE of 25 Pa (0.10 in. water).

Aerosol Sealing Profile

Your Heating and Cooling Capacity
Improvement for Duct Sealing is
17%

based upon measured leakage
reduction and original register flow

Certificate of Completion

Duct Sealing Performed for:

Mike Holmes
1 Canada
Canada, ON 45489
(905)687-6653

Overall Sealing Results

When we arrived,
YOUR DUCTS HAD:

328 CFM of Leakage, equivalent to a
62 Square Inch Hole

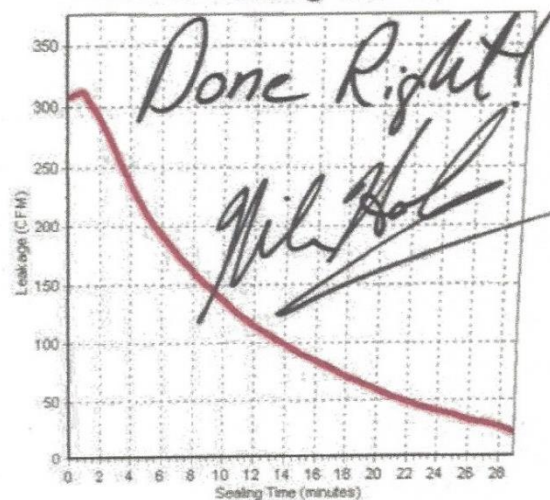

After we finished,
YOUR DUCTS HAVE:

25 CFM of Leakage, equivalent to a
5 Square Inch Hole

This corresponds to a **93%**
Reduction in Duct Leakage

Note: Duct leakage results are calculated in cubic feet per minute (CFM) measured at a standard OPERATING PRESSURE of 25 Pa (0.10 in. water).

Aerosol Sealing Profile

Your Heating and Cooling Capacity
Improvement for Duct Sealing is

27%

based upon measured leakage
reduction and original register flow
